# REPORT OF THE CENSUS OF THE THREE PROVISIONAL DISTRICTS OF THE NORTH-WEST TERRITORIES, TAKEN IN 1885.

To His Excellency the Most Honourable Sir HENRY CHARLES KEITH PETTY-FITZMAURICE, Marquis of Lansdowne, in the County of Somerset, Earl of Wycombe, of Chipping Wycombe, in the County of Bucks, Viscount of Caln and Calnstone, in the County of Wilts, and Lord Wycombe, Baron of Chipping Wycombe, in the County of Bucks, in the Peerage of Great Britain; Earl of Kerry and Earl of Shelburne; Viscount Clanmaurice and Fitzmaurice, Baron of Kerry, Lixnaw and Dunkerron, in the Peerage of Ireland; Knight Grand Cross of Our Most Distinguished Order of Saint Michael and Saint George; Governor General of Canada, and Vice Admiral of the same, &c., &c., &c.

MAY IT PLEASE YOUR EXCELLENCY,—

I have the honour to submit the Report of the Census of the three Provisional Districts of the North-West, Assiniboia, Saskatchewan and Alberta, taken in the month of August of the year 1885.

The whole respectfully submitted.

JOHN CARLING,
*Minister of Agriculture.*

Department of Agriculture,
OTTAWA, February, 1886.

## RAPPORT DU RECENSEMENT DES TROIS DISTRICTS PROVISOIRES DES TERRITOIRES DU NORD-OUEST, PRIS EN 1885.

---

A Son Excellence le Très-Honorable Sir HENRY CHARLES KEITH PETTY FITZ MAURICE, Marquis de Lansdowne, dans le comté de Somerset, Comte de Wycombe, de Chipping Wycombe, dans le comté de Bucks, Vicomte Calne et Calnstone, dans le comté de Wilts, et Lord Wycombe, Baron de Chipping Wycombe, dans le comté de Bucks, dans la pairie de la Grande-Bretagne; Comte de Kerry et Comte de Shelburne, Vicomte Clanmaurice et Fitzmaurice, Baron de Kerry, Lixnaw, et Dunkerron, dans la pairie d'Irlande; Chevalier Grand-Croix de Notre Ordre Très-Distingué de Saint-Michel et Saint-George; Gouverneur Général du Canada, et Vice-Amiral d'icelui.

QU'IL PLAISE A VOTRE EXCELLENCE.—

J'ai l'honneur de soumettre le rapport du recensement des trois districts provisoires du Nord-Ouest, Assiniboia, Saskatchewan et Alberta, pris durant le mois d'août de l'année 1885.

Le tout respectueusement soumis.

JOHN CARLING,
*Ministre de l'Agriculture.*

Département de l'Agriculture,
OTTAWA, février 1886.

# CANADIAN STATISTICS.

## CENSUS OF THE THREE PROVISIONAL DISTRICTS OF THE NORTH-WEST TERRITORIES TAKEN IN 1885.

To the Honourable JOHN CARLING,
Minister of Agriculture.

SIR,—I have the honour to lay before you the Report of the Census taken in the North-West Territories in 1885, and to say that the whole can now be placed in the printer's hands.

The detailed statement of the proceedings in connection therewith will be found in the introduction to the Report.

I have the honour to be, Sir,
Your obedient servant,
J. G. G. LAYTON,
*Statistical Officer.*

Statistical Office, Department of Agriculture,
OTTAWA, February, 1886.

# STATISTIQUE DU CANADA.

## RECENSEMENT DES TROIS DISTRICTS PROVISOIRES DU NORD-OUEST, 1885.

A l'honorable JOHN CARLING,

Ministre de l'Agriculture.

MONSIEUR,—J'ai l'honneur de vous soumettre le rapport du recensement des Territoires du Nord-Ouest de 1885, et de vous dire que le tout peut être de suite mis sous presse.

Dans l'introduction au rapport vous trouverez un état détaillé des procédés du recensement.

J'ai l'honneur d'être, monsieur,

Votre obéissant serviteur,

J. G. G. LAYTON,

*Officier de la Statistique.*

Bureau de la Statistique, département de l'agriculture,

OTTAWA, février 1886.

# CENSUS OF 1884-5.

## INTRODUCTION.

A Census of the three Provisional Districts of the North-West Territories was taken under authority of the Census Act, assented to on the 1st May, 1885 (48 Vic., Cap. III.)

As regards population, &c., it is a statement of facts existing on the 24th day of August, 1885, while all information relating to the Census year is for the twelve months immediately preceding that day.

The *de jure* system was adopted for the enumeration of the population.

The enumerating officers consisted of three Commissioners and one Assistant Commissioner whose duties were, generally, to superintend the preliminary arrangements and to instruct the enumerators, severally appointed for each district, there being 28 enumerators and 4 commissioners or 32 in all.

Mr. Layton, the Statistical officer, represented the Department and instructed the commissioners on the ground.

Each enumerating officer was furnished with a Manual of Instruction and Model Schedule, as a guide in making the entries.

The enumeration schedules were five in number, as follows:—

SCHEDULE 1—*Nominal return of the living*, containing 19 columns for the insertion of the answers to the questions on the following subjects: Residences, names, sexes, ages, birth places, religions, origins or nationalities, professions, married or widowed, state of education, and, lastly, infirmities, as deaf and dumb, blind and of unsound of mind.

SCHEDULE 2—*Public Institutions* and *Industrial Establishments*, containing 20 columns, showing the nature of the institution and the number of inmates; the kind of industrial establishment, capital invested, number of hands employed, wages paid, the value of raw material and articles manufactured and their value.

SCHEDULE 3—*Cultivated Lands, Field Products*, containing 26 columns.

SCHEDULE 4—Containing 30 columns relating to *Live Stock, Animal Products, Fur bearing Animals* and *Pelts.*

# RECENSEMENT DE 1884-5.

## INTRODUCTION.

Le Recensement pour les trois districts provisoires du Nord-Ouest a été fait sous l'autorité de l'" Acte du Recensement" sanctionné le 1er mai 1885 (48 Vic., Chap. III).

L'état des faits qu'il contient, quant à la population, se rapporte à la date du 24 août 1885, tandis que tout autre information touchant l'année du Recensement est donnée pour les douze derniers mois qui précèdent cette date.

Le principe adopté pour le dénombrement de la population est celui de la *population de droit.*

Le personnel employé pour faire le dénombrement se composait de trois commissaires et d'un assistant commissaire, dont la mission était de surveiller les travaux préliminaires et d'instruire les énumérateurs, au nombre de 28, nommés pour les différents districts; ce qui porte le personnel complet à 32.

Mr. Layton, officier de la Statistique, représentant le département, se rendit sur les lieux pour y instruire les commissaires.

Le Manuel des instructions et les tableaux-exemples furent distribués aux commissaires et à chaque énumérateur pour les guider dans le mode de procéder au dénombrement.

Les tableaux du dénombrement sont au nombre de cinq.

Le TABLEAU 1, *dénombrement des vivants*, contenant 19 colonnes destinées à enregistrer les réponses aux questions faites par l'énumérateur, sur les sujets suivants: la résidence, le nom, le sexe, l'âge, la religion, le lieu de naissance, la nationalité, la profession, l'état de mariage, l'instruction, et les infirmités telles que sourds-muets, aveugles et aliénés.

Le TABLEAU 2, *institutions publiques* et *établissements industriels*, contenant 20 colonnes dont 4 pour enrégistrer le nom spécial ou légal, le genre de l'institution, ainsi que le nombre des personnes internées; les 16 autres colonnes ont rapport aux établissements industriels, donnant le nom du propriétaire, le genre de l'établissement, le nombre de personnes employées, le montant du capital placé, la valeur des matières première et la valeur des produits manufacturés.

SCHEDULE 5—Containing 25 columns, relating to *Fisheries*, *Products of the Forest*, *Minerals* and *Prairie Lands*, broken up and seeded.

These Census schedules were to be, and have been, filled up by the enumerators going in person, from house to house, within the limit of the sub-district or division thereof assigned to him.

The columns of Table I headed "Temporary Dwellings" refer to temporary dwellings as vessels, shanties, tents and wigwams. There was only one vessel inhabited on 24th August, 1885. The words *Shanties*, *Wigwams* and *Tents* are intended to denote the temporary dwellings of the Indian population, on their several reserves, and of the temporary lodges of the wandering or nomadic Indians.

TABLES II, III and IV,

Need no remarks.

TABLE V.

Ages of the people are counted from the last birthday and are recorded as they were given. The column headed under one year, therefore, represents a greater or lesser fraction of a year, and those severally headed 1 to 2, 2 to 3, successively, represent the numbers of persons living on the Census day at one year of age last birthday and two years of age last birthday.

In this and other tables there is a column headed "not given" and, as may be supposed, is largely composed of Indian population.

TABLE VI to X,

Inclusive, require no explanation.

TABLE XI.

Occupations of the people are arranged alphabetically.—Occupations somewhat similar to each other are thus necessarily separated one from the other. But it is desirable and necessary to give the occupations followed in each district separately and this is deemed the simplest way of doing it.

Persons engaged in more than one occupation are not put down severally to each, but to that which they happened to be following, at the taking of the Census.

The numbers specified as following certain trades and industrial pursuits include all engaged in them as laborers and apprentices as well as masters and assistants.

Details in reference to the occupations of the people are further supplemented under the head of Industrial Establishments at Table XIX; but of course there can be no concise agreement between the two statements; the one giving the number of hands employed at the several industries, it may be a week or a month or a year, the other giving the occupation to which he devotes the principal part

Le TABLEAU 3, contenant 26 colonnes ayant rapport aux terres cultivées et aux produits des champs.

Le TABLEAU 4, contenant 30 colonnes, donnant le nombre d'animaux vivants et leurs produits, ainsi que la quantité de fourrures et de pelleteries.

Le TABLEAU 5, contenant 25 colonnes ayant trait aux pêcheries, aux produits de la forêt et aux produits des mines ; donnant aussi le nombre d'acres de terres de prairie labourés et ensemencés.

Les tableaux du Recensement devaient être et ont été, en effet, remplis par les énumérateurs allant de maison en maison, chacun dans les limites du sous-district ou de la division qui lui a été assignée.

Les titres en tête des deux premières colonnes du TABLEAU I, de ce rapport, ont trait aux demeures temporaires telles que navires, chantiers, tentes et ouigouams. Comme ce tableau le démontre, il n'y avait qu'un navire habité, le 24 août 1885. Les mots chantiers, ouigouams et tentes représentent les demeures temporaires des populations sauvages sur leurs différentes réserves, ainsi que les loges des tribus nomades.

LES TABLEAUX II, III ET IV

ne demandent pas d'explication.

DANS LE TABLEAU V,

on a donné l'âge, tel qu'il a été enregistré, année par année, et on l'a compté comme se rapportant au dernier anniversaire de la naissance. La colonne en tête de laquelle se trouvent les mots, *moins d'un an* représente ainsi une partie plus ou moins grande d'un an, et les autres marquées de 1 à 2, de 2 à 3, etc., représentent successivement le nombre de personnes âgées d'un an au dernier anniversaire de la naissance ou âgées de deux ans au dernier anniversaire de la naissance, etc. Dans ce tableau comme dans ceux où elle se trouve, la colonne marquée *non donnés* se rapporte à la population sauvage.

LES TABLEAUX VI À X

ne demandent pas d'explication.

LE TABLEAU XI,

les occupations des personnes sont représentées alphabétiquement. De ce système il résulte que les occupations ayant quelque similitude entre elles, sont nécessairement séparées les unes des autres, mais ce genre de classement a été adopté comme étant le plus précis et le plus simple pour mentionner les occupations diverses dans chaque district. Aux personnes ayant plus d'une occupation, on a donné celle qu'elles se trouvaient à suivre lors du dénombrement.

Le nombre de personnes désignées comme exerçant certain métiers ou poursuivant certaines industries comprend tous ceux qui y sont engagés, tels que les ouvriers et les apprentis, les maîtres et leurs aides.

of his time. As regards the female population it must be borne in mind that the enumeration does not pretend to give the occupations of all, but only as far as they are engaged separately as heads of families, servants, &c.

### Table XII

Is a statement of the component parts of the several classes of occupations given in the preceding Table XI, from which it is abstracted.

### Table XIII

Is a statement of the number of churches belonging to the several denominations and of benevolent and educational establishments.

### Table XIV.

Occupiers of lands and lands occupied. This table needs some little explanation. It will be noticed that under the sub-heading "Total occupied", Alberta shows the largest quantity occupied, but the smallest cultivated; the explanation is that it is here where the great ranches are situated. Assiniboia comes nearer Alberta in occupied lands, but in cultivated lands it has about ten times the quantity, the one being the cattle feeding district and the other the wheat growing district.

### Tables XV and XVI

Require no particular explanation.

### Table XVII.

Furs and Pelts. Much difficulty was experienced in collecting the materials for this table, nor is it supposed that they have been reported with absolute accuracy. In other censuses that have been taken, the quantities have always been obtained from the "hunters," but in this instance that rule was departed from, because of the impossibility of obtaining the information from many of the Indians and then on the other hand we could not be sure that they had not been twice reported, that is, once by the Indians who sold to the traders and again by the traders to whom we were compelled to resort for information. It may be in this way that the thirty six buffalos are reported, they having been killed by resident Indians but outside of either of the provisional districts and reported by residents.

### Table XVIII.

Only one explanation appears necessary to this table. It is with regard to the "Census standard" for measuring Pine, Spruce and other logs. The existing diversities in the mode of measuring these logs in different parts of the Dominion appear to render this necessary in order that comparisons may be made. The standard log is made equal to 100 square superficial feet of lumber or board measure of one inch thick.

D'autres détails touchant les occupations sont donnés plus loin dans le tableau des établissements industriels, mais ces deux tableaux ne sauraient correspondre, l'un avec l'autre ; l'un donnant le nombre de personnes employées dans les différentes industries durant peut être une semaine, un mois ou une année ; l'autre les occupations que suivent les personnes d'une manière permanente, ou à peu près. Pour ce qui a trait aux occupations des femmes, celles qui sont à la tête d'une famille où qui sont engagées en service ou autrement ont seules été enregistrées.

### Le Tableau XII,

est un état des éléments dont sont composées les classes des occupations, telle que représentées à la fin du tableau précédent duquel il est tiré.

### Le Tableau XIII,

donne le nombre d'églises appartenant aux différentes confessions ainsi que le nombre des institutions d'éducation et de bienfaisance.

### Le Tableau XIV,

*Occupants de terres et terres occupées,* ce tableau demande quelques explications. On verra par exemple en comparant les totaux, que le district d'Alberta accuse la plus grande quantité d'acres de terre occupés et la plus petite quantité d'acres cultivés. Les nombreux *ranches* situés dans ce district en sont l'explication. Le district d'Assiniboia vient ensuite avec un nombre moindre en acres occupés, mais avec un nombre dix fois plus considérable en acres cultivés ; l'élevage des bestiaux se fait sur une vaste échelle dans le premier district tandis que la culture des blés se fait très en grand dans le dernier.

### Les Tableaux XV et XVI

ne demandent aucune explication.

### Le Tableau XVII,

*Fourrures* et *pelleteries,* ce n'est pas sans beaucoup de difficultés que la matière contenue dans ce tableau a pu être recueillie, et les résultats ne peuvent atteindre qu'une valeur approximative. Dans les recensements précédents les quantités de fourrures enregistrées ont été obtenues des chasseurs, mais dans celui-ci la chose devenait presqu'impossible, vu la vaste étendue de territoires que parcourent les chasseurs D'un autre côté, en obtenant ces informations des chasseurs, on s'exposait à les enregistrer deux fois ; d'abord par les chasseurs, ensuite par les *traiteurs* à qui ces produits sont vendus. C'est pourquoi nous n'avons eu recours qu'à ces derniers. Ceci explique peut-être comment les 36 Buffles, tués sans doute en dehors des districts provisoires, ont été enregistrés comme l'ayant été dans le district où réside le *traiteur.*

TABLE XIX.

Needs no special explanation.

It was deemed advisable to depart from the ordinary way of enumerating people, in regard of Indians; the objections to such a course were several, the primary one being the difficulties in regard to languages which was insurmountable; besides there is an excellent authority for stating that an attempt to enumerate the Indians in the regular manner would tend to excite them; that they would not understand the real object and would be sure to attribute it to a wrong and perhaps a mischievous motive, so that the only way was deemed to be to call in the aid of the different agents, who have a record of all Indians receiving supplies and treaty payments from the Government.

It may here be remarked that most of these Indians are heathens and many have several wives, but in the agents' books these are not so classed but, with the exception of one to each Indian, are put down as so many heads of families, sometimes with children and are called widows. Some of these squaws have either left or been dispensed with by the Indians after years of cohabitation, sometimes, taking their children and thus making a separate family. We thus found many marked as widows whom we knew were not widows but wives, but neither agent nor any one else could say whose wife.

Le Tableau XVIII,

*marine et pêcheries, produits de la forêt et des mines.* Un mot d'explication suffit pour ce tableau. Comme il existe plusieurs méthodes de mesurer les billots il est bon d'expliquer ici celle qui a été adoptée pour le recensement. *L'étalon* de *Recensement* donne un billot pour l'équivalent de chaque 100 pieds mesure de planche.

Le Tableau XIX,

ne demande aucune explication.

On a trouvé qu'il était impossible d'enregistrer les populations aborigènes de la même manière dont le sont les autres populations ; les raisons en sont nombreuses, la principale étant l'ignorance de leur langue, pour un grand nombre d'énumérateurs ; de plus, tout nous porte à croire que ces populations n'auraient pas vu la chose d'un bon œil, ne pouvant comprendre le but d'un recensement, il y avait le danger de les voir prendre cette opération comme quelque chose de dangereux ou de préjudiciable. De sorte que la manière dont les énumérateurs ont procédé a été reconnue la meilleure : le dénombrement, pour les sauvages qui reçoivent de l'argent ou des provisions du gouvernement, a été fait sur les registres des agents.

Il est à remarquer qu'un grand nombre de sauvages n'ont pas encore embrassé la religion chrétienne et que plusieurs d'entre eux sont polygames, quoiqu'ils soient donnés dans les registres des agents comme n'ayant qu'une seule femme avec laquelle ils vivent maritalement. Plusieurs de ces femmes après des années de cohabitation ont quitté d'elles-mêmes où ont été chassées du toit conjugal par celui avec qui elles vivaient, emmenant quelquefois leurs enfants avec elles et formant ainsi une famille à part. De cette sorte, le nombre des veuves est en apparence beaucoup plus considérable qu'il ne l'est en réalité.
